WEBSCAN条形码检测仪

TruCheck?401和TruCheck? USB条形码检测仪符合MIL-STD 130M, ISO-16022, I AIQG AS9132系统等级的要求。主要应用于标签、铭牌和直接印记码的检测。以所NIST为标准, TruCheck是目前唯一满足所有规格要求的系统, 满足所有UID求。

主要型号有:TRCHECK 101, TRCHECK 101R, TRCHECK 201, TRCHECK 201R, TRCH TRCHECK 401R, TRCHECK 401RL , TRCHECK USB

Model 401 Quality Measurements Include:

- Unused Error Correction
- Modulation
- Axial non-uniformity
- Grid non-uniformity
- Symbol Contrast
- Bar width growth (X and Y)
- Reference decode
- Finder pattern damage
- ISO or AIM Verification
- Fixed optics, no operator adjustments
- Easy to use, hands-free

operation

Verification Services Now Available! Contact Us for Details

Application:

TruCheck? 401 and TruCheck USB barcode verifier conforms to MIL-STD 1 system grading requirements according to all of the following specifications: 16022, ISO 15415, AIQG AS9132. or AIM-DPM. TruCheck works on labels, direct parts marks.

TruCheck is calibrated with standards that are NIST traceable. Option also be used for linear and 2D (PDF417 and Code 39) verification with the TruSweep laser scanning head.

Product Information/Reporting:

TruCheck is simply the most accurate bar code verifier on the market! tired of the inconsistent results that hand-held verifiers produce, TruCheck is the system for you!

Engineered for repeatability, the TruMatrix imaging head, combined with 30 degree or combination 30/45/90 degree illumination in a rugged housing provides ideal conditions for verification with the CCD-based imager. After simple calibration, there is nothing to focus or align. You are guaranteed to get consistent and stable verification results available. TruMatrix eliminates operator error resulting in accurate results.

Optional linear verification can be accomplished by expanding TruCheck with the TruSweep laser scanning head for linear and 2D (PDF417 & Code 39) verification. At the touch of a button, the TruSweep head automatically provides multi-line verification top to bottom on the code.
